

TECHNOLOGY IN MOTION

# One for all

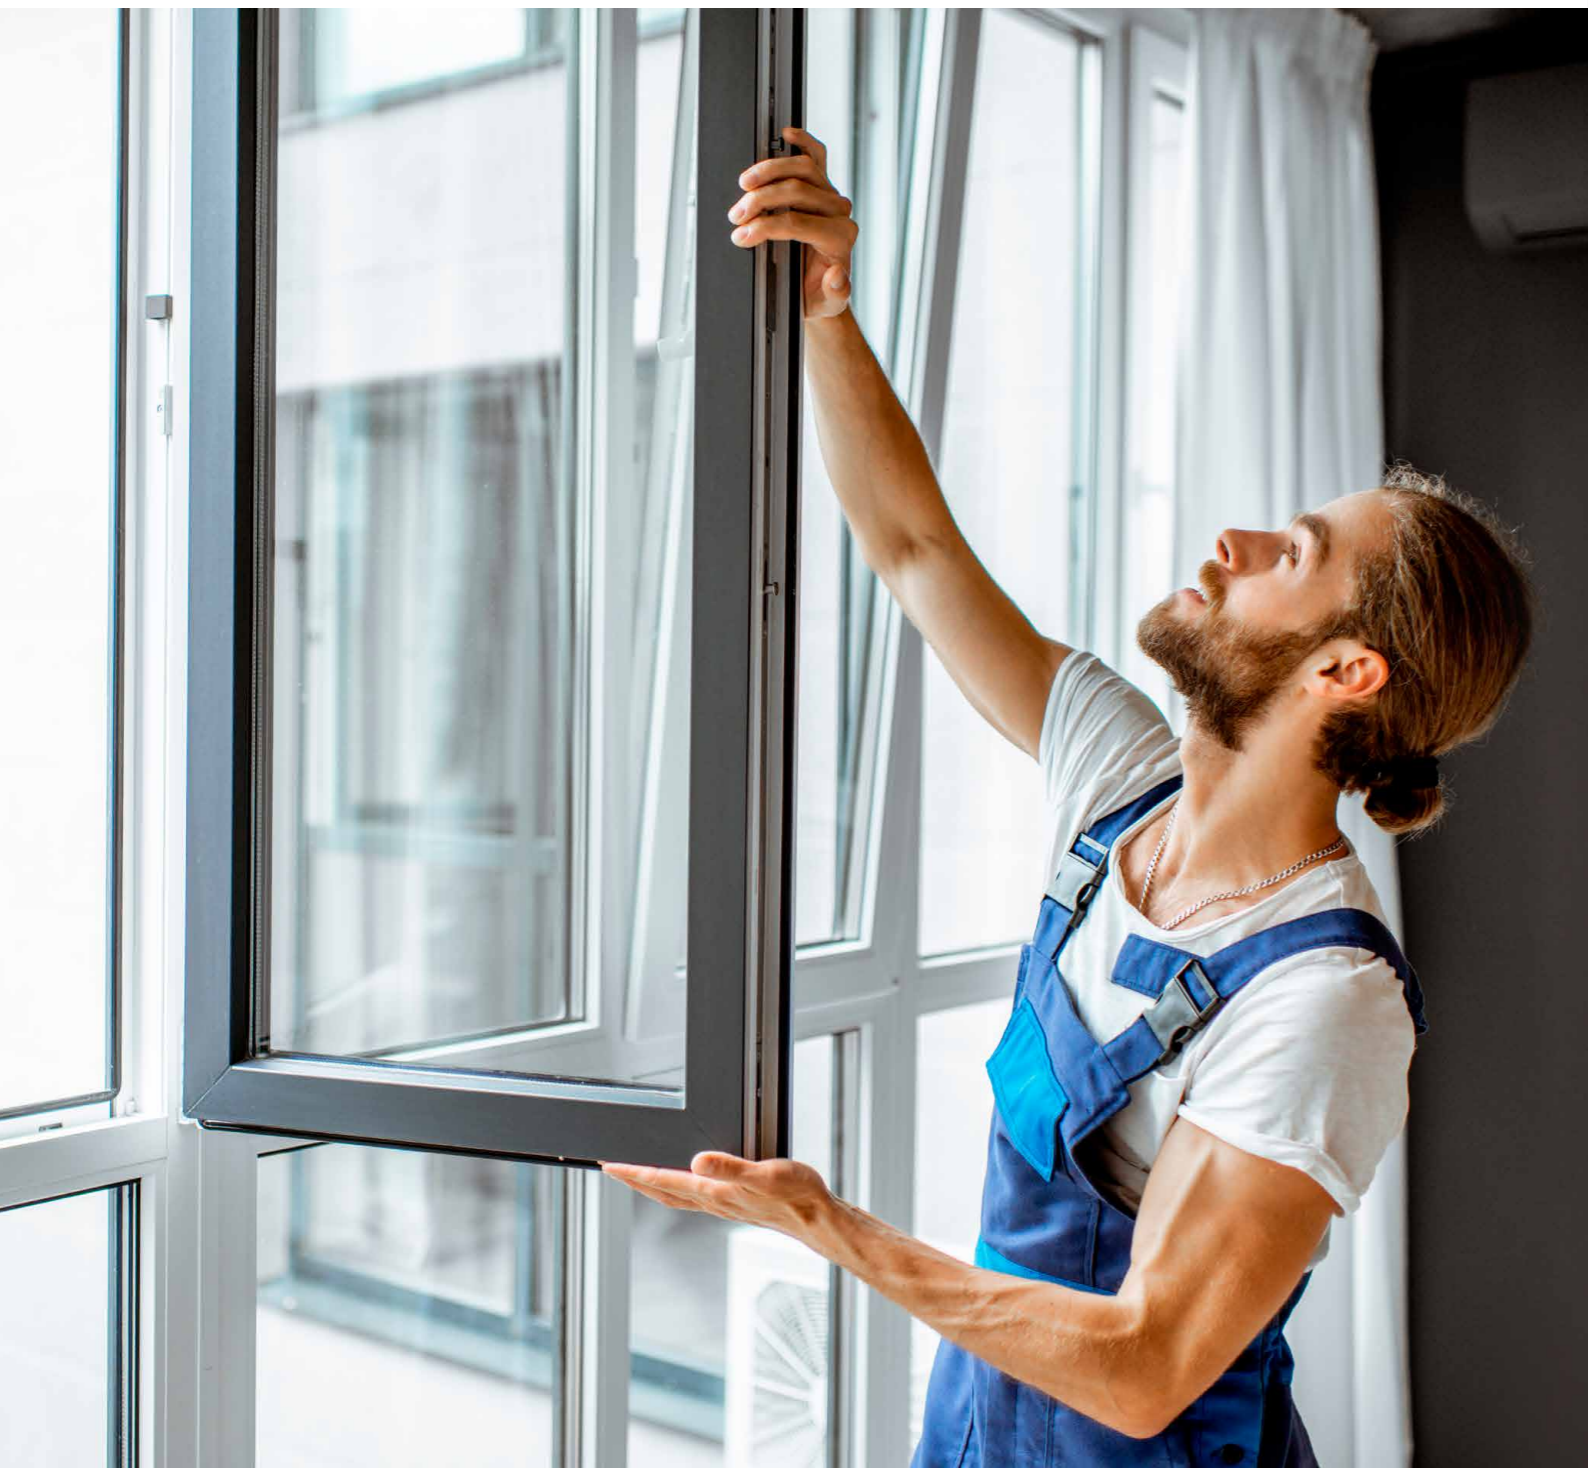

## MACO MULTIFUNCTION TOOL

TIMBER  
PVC  
ALUMINIUM

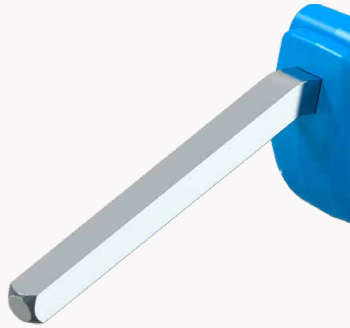

## Save time ... ... with the multifunction tool

Because time is money! How annoying is it when you're doing a window service on the fourth floor of a customer's house and you don't have the right tool? This is now a thing of the past with the MACO multifunction tool. With it, you always have five tools at hand.

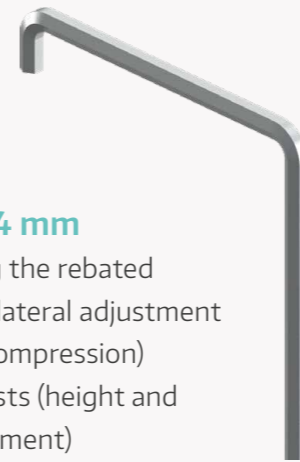

### Spindle 7 mm

As a window handle replacement, for example in window production, in order to fix the sash to the frame for transport

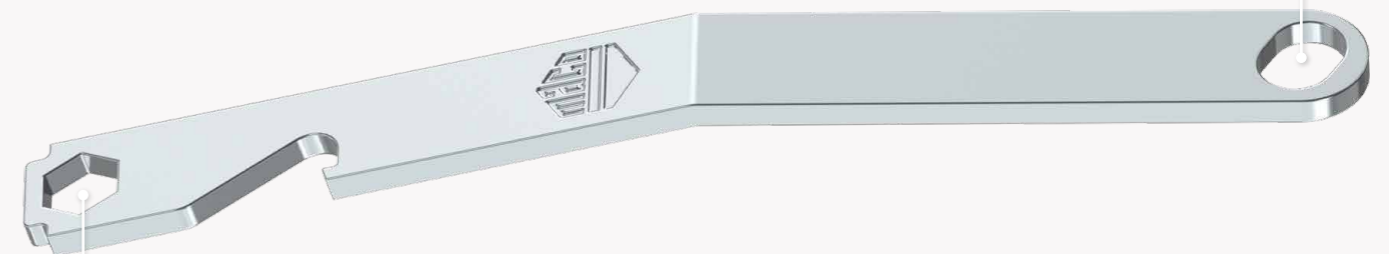

### Allen key 4 mm

For adjusting the rebated scissor stay (lateral adjustment and gasket compression) and pivot posts (height and lateral adjustment)

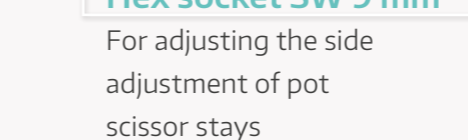

### Key for locking cam

For adjusting the gasket compression of window elements whose hardware are equipped with locking cams

### Hex socket SW 9 mm

For adjusting the side adjustment of pot scissor stays

### TX 15

For adjusting the i.S. cam (gasket compression), the height adjustment of the sash lift and mishandling device, as well as the gasket compression adjustment on Multi Power scissor stays

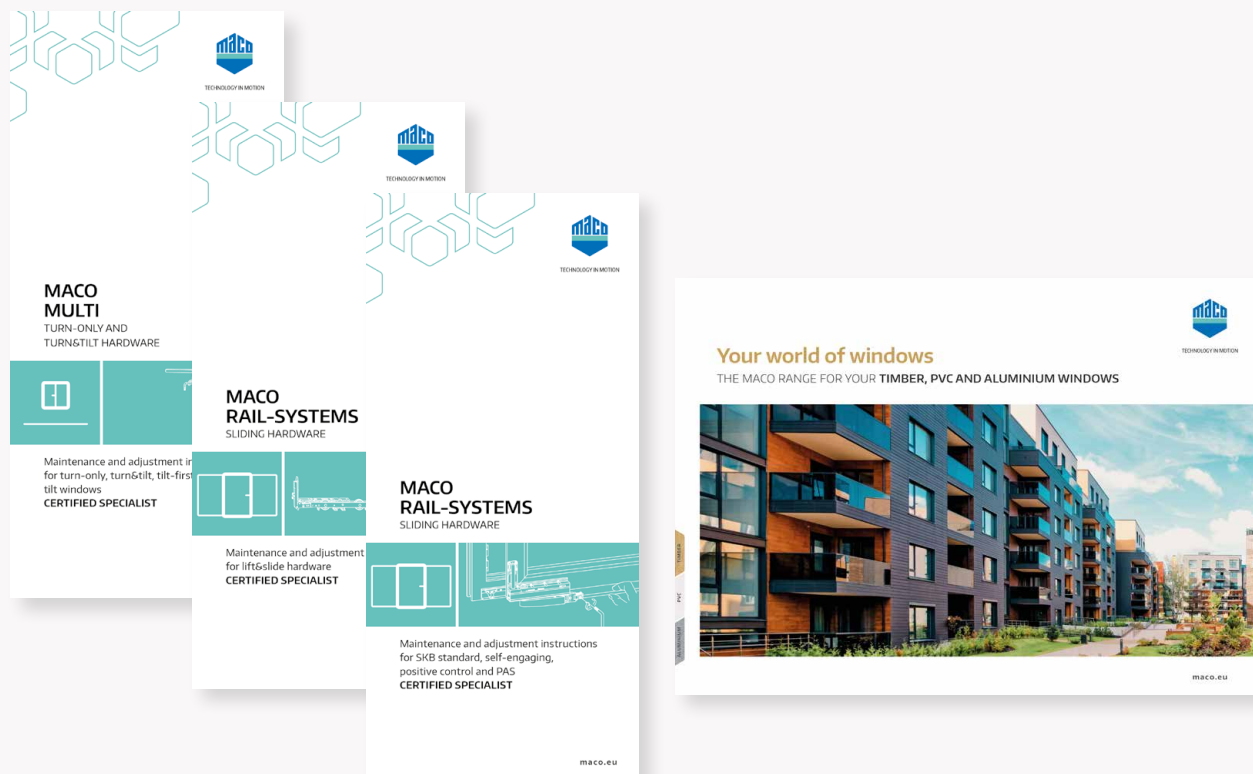

### Blade for scissor stay hinge pin (window)

As a safety-relevant component, it is not allowed to remove the scissor stay hinge pin with simply any tool. In order to pull it out easily, the multifunction tool has this special blade ready. In addition, there are two spare blades inside the tool.

# Would you like everything from a single source?
