Seamless Connectivity for Increased Security

eTronic

By integrating your new windows and doors together with eTronic smart sensors and accompanying door sensor as part of the Homee smart solution you are enabling your home to be truly smart. From basic security alerts along with open, closed and locked notifications your new windows and doors will be able to coincide intelligently with your home alarm systems, smart lights, heating, garage door and more to eTRONIC create a truly smart home.

Peace of mind security

With the status of your windows and doors instantly available at your fingertips you will always sleep with peace of mind at home or when away.

Remote smart home capabilities

Control heating, monitor security and have access to your entire homes smart capabilities from wherever you are.

Extensive battery life

Your sensors come with an impressive 5 year battery life that are easy and simple to replace.

A closer look

- › 5 year battery life
- › Fits all MACO window locks
- › Plug & play installation
- › Fits all window materials

Intelligently smart Homee – your cubes

Homee starter cube

From ready to go, the Homee starter cube not only acts as the brain of your smart home but also your secure data security cube. This means all your data and smart home power is physically based keeping it safer off line completely. Opening a world of capabilities that all can be simply and fully customisable and controlled via the Homee App. Simply download the app from either the Apple or Google Play store on your smart device and open the only app you'll ever need to have a control panel for your entire smart home.

Mint cube

The Mint Cube is your gateway to enable your windows and doors to connect with all your eTronic smart home devices and operations. From your alarm systems, Alexa's, Google home, heating and lighting the solution allows you to easily create a truly connected smart home with ease and comfort*. The Homee System is all inclusive meaning your smart home will continually be updated with features and benefits free of charge for the lifetime of your smart home.

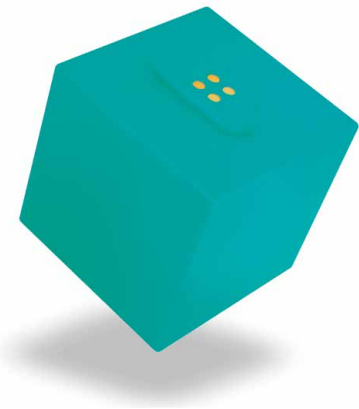

Security from physical to digital included

Limes Security a leading global IOT security partner have certified the brain (white) cube by performing a range of high level penetration tests of which it passed successfully. Your smart (mint) cube is not connected to the Internet or a cloud ensuring that your data can not be accessed by intruders and has no digital vulnerability ensuring you can have complete peace of mind.

Note: Additional devices may be required, for more information please scan the QR code on the back of this brochure.

Your smart window & door journey

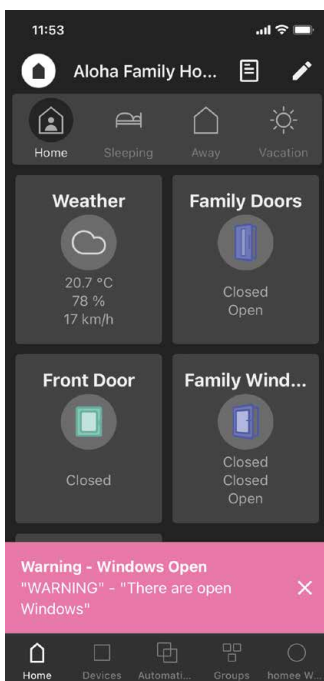

High Level Cube Data Security

Simple Modular Expansion for ever expansive smart home capabilities

Zero Monthly Costs with Free Lifetime Updates

1

When choosing your new doors & windows you can choose how many of them you will want sensors on. For a complete and total solution we would recommend every window and door to be connected. Spacing and tabbing is out, also does not read very well. Don't forget to add the Homee starter kit at the same time so you can set up your smart home the day that your doors and windows are installed.

2

Connect your new Homee smart to a USB power supply, download the app from the app store that suits your device and then create your Homee account. This will then become your access to build your smart home the way that works best for you.

3

Enjoy the ability to be able to integrate more of your home as part of a smart home solution. With continuous life time updates all completely free from Homee you can be sure to have the latest features and most up to date smart capabilities in your home forever.

Works with apple home, alexa, google home smart speaker devices

Your smart features & benefits

Integrate seamlessly with other smart devices

5 year battery life which can easily be replaced

Free lifetime updates

Unlimited users allowing access for the entire family

Fitted to your windows at any time

Accessible via phone, tablet or PC

For more information on transforming your windows and doors into an integral part of the smart home, scan the QR Code.

A connected home = a smart home

Intelligent connectivity

Window security starts at the door

Instant notification of a unlocked window from the moment front door to leave. Your Homee App will notify you of any unlocked window as soon as you open your door meaning you never leave your home unsecured. Even if the window has been left open in the night ventilation position your sensors will align with home insurance standards and notify you that it's unlocked and therefore vulnerable to attack.

Always stay in the loop with instant alerts

When a window or door is opened, closed and locked within your home your Homee App will instantly notify you via critical warning alerts for when your not in your home, meaning you can have visibility on your entire home at all times from wherever you are in the world.

Energy saving control

The efficiency of your home is important and wastage of heat is not only negatively impacting the planet but also leads to unnecessarily higher energy bills. With the Homee smart system you have the option to bring additional products as part of your smart home solution. These then in turn enable you to create a smart home that maximises energy efficiency so when windows are open the heating in that can be switched off and likewise switched back on when the window is closed. Additional smart connected products are required to enable this feature.

**Download The Homee App
and start your smart home
journey today.**
