The reliable solution MACO Multi Mammut – flexible and powerful

Effortless large windows

Large windows mean more light but also heavier weight. With **MACO Multi Mammut** you can manage both and have the freedom to implement windows according to the individual requirements. Our heavy-duty hardware effortlessly supports and moves windows with one- and two-sash units weighing up to 220 kg (timber) or 180 kg (PVC), and with surfaces of up to 3.6 m².

That's MACO Multi Mammut – the reliable solution.

Benefits for fabricators

01 Powerful reliability

Easily implement window units weighing up to 180 kg (PVC) or 220 kg (timber).

02 Highly flexible

Window formats up to an area of 3.6 m² can be installed in a variety of designs.

03 Wide variety of features

More design options thanks to a range of colours and, with Tricoat Evo, a surface finish that meets the highest requirements and a variety of areas of application.

Benefits for consumers

01 Energy efficiency and ease of use

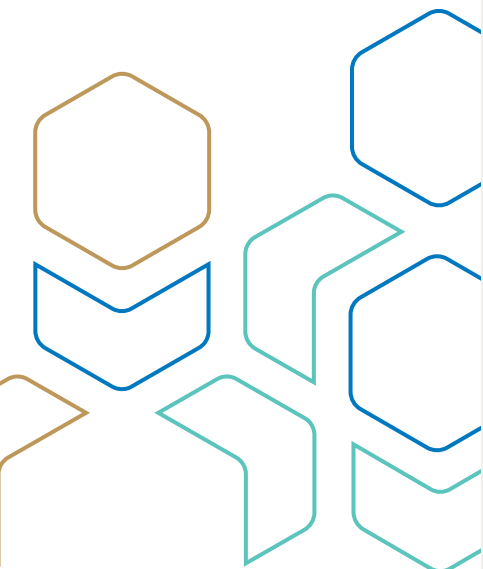

Window units with triple glazing are possible and can be moved with ease.

02 Customised variety

Ready for barrier-free accessibility, enhanced burglary protection and protection against incorrect operation with coordinating accessories.

03 Premium look

From standard window to designer window: MACO Multi Mammut is available in many colours.

Special properties

What you can expect from us

Maximum variety of windows

For PVC or timber, for windows or casement doors, and for installation on the right or left: **MACO Multi Mammut** offers wide flexibility for window construction. As a **custom solution**, tilt windows weighing up to 250 kg and with a surface area of up to 5.6 m² are also possible. Fully barrier-free access is possible with PVC casement doors, even with a threshold.

Enhanced security

MACO Multi Mammut is equipped with our modern i. S. security roller cam as standard. This means enhanced burglary protection, since combining the hardware and cam simply provides better resistance against attempts to lever a window open. Adding security glazing improves security even further – without restricting the window's ease of movement.

Built-in energy efficiency

The special installation method makes it possible: when using **MACO Multi Mammut**, there are no interruptions in the weather seal. This means that there are no weak points where heat or energy is lost. Our heavy-duty hardware allows individual adjustment of the surface pressure – and thus of the thermal and energy insulation as well.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit System components for MACO Multi Mammut

Handles

Function, security and design: MACO offers ergonomic handle solutions with superior features.

Window rebate vents

Our window rebate vents allow ventilation even when the windows are closed – which is good for the indoor climate and the building structure.

Thresholds

No need to worry about energy loss or condensation: our threshold solutions insulate effectively.
