Window rebate vents for safe ventilation

MACO Vent

Better ventilation, better for all

If you think manually ventilating rooms is not effective or is too time-consuming, we have the solution: **MACO Vent** window rebate vents. Our ventilation solution aerates continuously and independently, improving the indoor climate in a simple and safe way. Good air quality helps improve well-being and health, and is equally effective in preserving the quality of the building – i.e., the building structure.

Benefits for fabricators

01 Systematic compatibility

One vent for all windows: A guaranteed coordinating accessory for PVC system solutions

02 No maintenance required

Installed and complete: No further work is required after installation – for the life of the product.

03 Lucrative investment

Small price, big impact: Highly effective and high-quality enhancement for every window, with minimal effort

Benefits for consumers

01 Better indoor climate

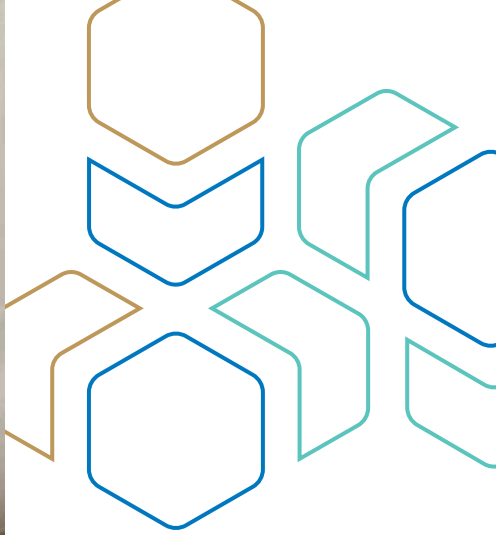

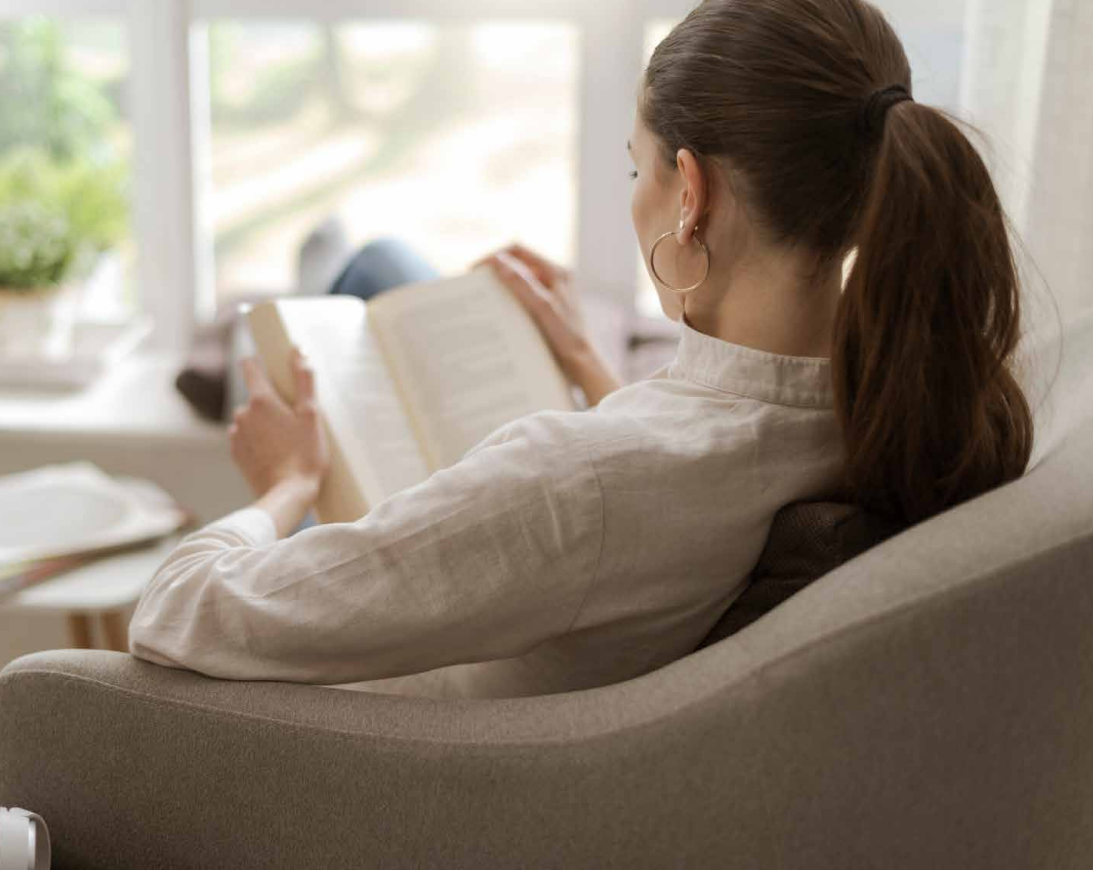

Automatic and efficient: Continuous ventilation improves well-being and protects the health of occupants.

02 Convenient retrofitting

Simple and flexible: The rebate vent can also be retrofitted quickly and inexpensively.

03 Superior protection of the building

Good for building materials: Autonomous ventilation and aeration maintains the long-term quality of the building structure.

Special features

Automatic ventilation without draughts

Ventilation without negative consequences: **MACO Vent** ensures a controlled, minimum exchange of air with very little energy loss – even when no one is home and while windows are closed. And equally convenient: The aerodynamically effective sealing lip of our ventilation solution minimises air flow to the inside. The end effect: no draughts.

Invisible, flexible and soundproof

Not visible from the outside and therefore also not a weak point for burglary. This means that the rebate vent can be closed manually or automatically and the soundproofing remains virtually unaffected.

Ventilation without effort

Unlike decentralised and centralised ventilation systems, window rebate vents do not require any structural modifications. Especially in combination with existing exhaust air systems, they are an effective way to prevent mould – while at the same time ensuring a pleasant and healthy indoor climate at all times.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit Other system components such as MACO Vent window rebate vents

Handles

Functionality, security and design:
With **MACO Emotion**, we offer ergonomic handle solutions with superior properties.

Weather seals

Energy savings with sound insulation and comfort: **MACO Adapta weather seals** offer all this in a range of materials and designs for custom-tailored solutions.

Thresholds

No chance for condensation to form: **MACO Transit thresholds** insulate effectively, save energy and ensure sustainable building quality.
