Optimum weather seals for windows and doors

MACO Adapta weather seals are designed to work perfectly with our hardware and to withstand everyday conditions. They offer the properties needed to ensure that windows and doors keep rain, wind and cold outside – and keep energy and heat inside. As experts in hardware, we offer weather seals in a variety of materials for various areas of application and with excellent resilience. This refers to the elastic quality of the weather seal, which is compressed each time a window or door is closed and thus creates a seal.

Benefits for fabricators

01 Wide selection of materials

Foamed or in a compact design: Weather seals in uPVC, TPE, EPDM and silicone

02 Easy fabrication of corners

Per 45° or 90° angle cut: **MACO Adapta weather seals** can be fitted and welded around corners.

03 360° system components

Optimum interaction: MACO hardware, thresholds and seals are designed to coordinate perfectly with each other and keep seals absolutely air- and watertight.

Benefits for consumers

01 Excellent sealing performance

Maximum energy efficiency: for a better indoor climate and real savings

02 Effective sound insulation

Certified and confirmed: **MACO Adapta weather seals** achieve the best ratings for the toughest requirements.

03 High durability

UV, weather and thermal resistance: for excellent resilience over many years

Special features

Custom-tailored performance

MACO Adapta weather seals are available with a wide range of performance features. And there's good reason for that – after all, requirements for a window seal are different to those for a front door seal. What all our solutions have in common is their exceptionally long service life. So when choosing the coordinating weather seal, you can be sure that they have the required properties.

Best sound insulation in the industry

TC2015f: This is the name of our very exceptional interior door seal. Timber interior doors fitted with the TC2015f seal achieve the best sound insulation in the industry. This is also confirmed by the test report from the independent gbd Lab for joint widths of five and six millimetres.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit Other system components such as MACO Adapta weather seals

Handles

Functionality, security and design:
With **MACO Emotion**, we offer ergonomic handle solutions with superior properties.

Window rebate vents

Good for the indoor climate:
MACO Vent allows ventilation even when windows are closed – without requiring any construction measures.

Thresholds

No chance for condensation to form: **MACO Transit** thresholds insulate effectively, save energy and lastingly safeguard the quality of the building structure.
