# Shutter hardware for weather and privacy protection MACO Rustico

TIMBER  
PVC  
ALU

# Protection with style

Design and function – that's what all **MACO Rustico shutter hardware** delivers. Shutters not only add character to any building, they also protect against wind, weather and prying eyes. And they make life difficult for burglars. Our solution is above all easy to use, durable and environmentally friendly, as all hardware is coloured without the addition of harmful solvents.

## Benefits for fabricators

### 01 Wide variety of components

For timber, PVC and aluminium shutters: **MACO Rustico** offers the right solution for all materials.

### 02 Various application possibilities

Different solutions for different applications: whether corrosion-resistant for coastal regions or especially slender for folding shutters popular in southern regions.

### 03 Secure installation

Patented bracket lock: prevents installation errors with pins that connect the shutter to the masonry or window frame.

## Benefits for consumers

### 01 Reliable protection

Wind, weather, cold, light and burglars: **MACO Rustico shutter hardware** offers additional protection with style.

### 02 Longer lasting ease of use

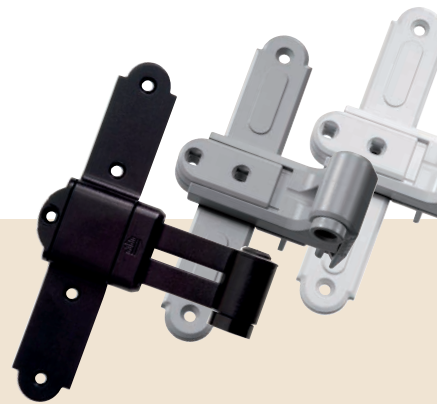

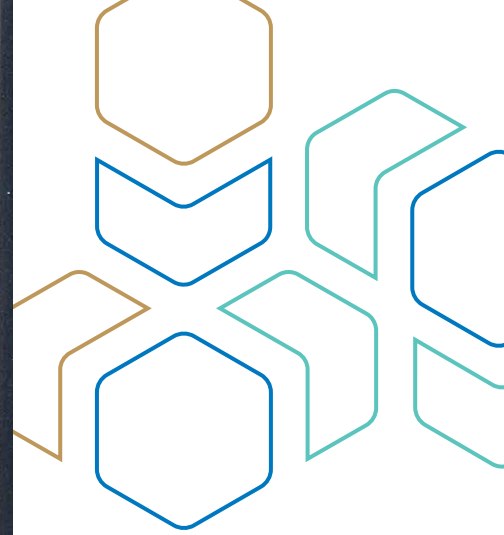

Even after years of use, our shutter hardware provides consistently smooth operation.

### 03 High durability

Excellent materials and workmanship, with a 10-year warranty on all shutter hardware.

## Special features

### Environmentally friendly range of colours

Three standard colours and more: **MACO Rustico shutter hardware** is available in black, grey and white. At MACO, environmental friendliness is a matter of course, as all our paints contain no solvents.

### Extensive range of accessories

More enjoyment from shutters: **MACO Rustico** offers an extensive range of accessories for that. For example, almost-invisible shutter brackets that fasten shutters in place, or the safety catches that can withstand strong winds when the shutters are open. The crank opener, which conveniently opens the shutters from the inside even when the windows are closed, provides excellent ease of use.

### Clever protection against access

Closed shutters are not only a good protection against prying eyes. They are also protected themselves against unwanted dismantling. The shutter pintles or pins – that is, the elements that connect the shutter to the masonry or window frame – are screwed to the side and are therefore not accessible when the shutter is closed.
