Drive units for greater ease of use MACO Comfort Drive

Easy automatic operation

Lift & slide heavy doors with the touch of a button: **MACO Comfort Drive drive units** make it effortless, quiet and secure. The drive units independently move sash weights of up to 440 kg – and stay hidden, where desired. The drive solutions can be concealed by fitting them directly in the frame, or they can be surface-mounted. Smart home integration, including control via app, takes ease of use to the next level.

Benefits for fabricators

01 High compatibility

Whether for timber, timber-aluminium or uPVC sliding doors: The drive units are compatible with various hardware and threshold solutions.

02 Quick installation

Always a perfect fit: The modular design and simple electrical connections make for quick installation.

03 Wide variety of uses

Suitable for Diagram A and Diagram C: Drive units for lift & slide elements for profile thicknesses from 56–110 mm.

Benefits for consumers

01 Built-in security

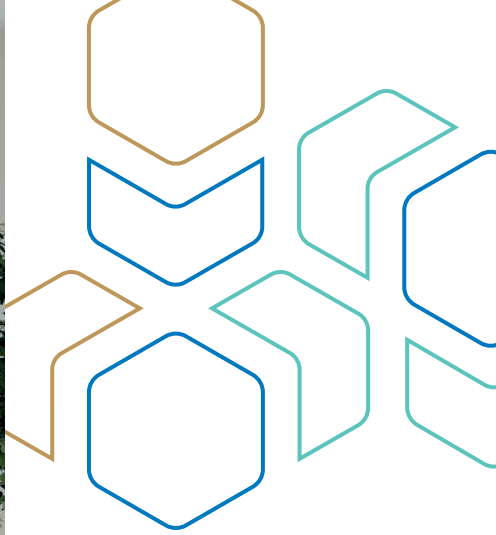

Reliable crush guard for children and pets – always included with casement doors weighing up to 330 kg.

02 High ease of use

At the touch of a button and via app: Motorised opening and closing of heavy sliding doors with no effort required and virtually no sound.

03 Enhanced burglary protection

Part of the solution: The drive units enable sliding doors to withstand burglary attempts in line with the RC 2 security class.

Special features

Automatic support

MACO Comfort Drive drive units are available in two versions. With the “HS” version, all lifting and sliding movements are fully automatic via the touch of a button or app control. The “S” version works semi-automatically and handles the strenuous effort required to slide the sashes open and shut. Lifting and unlocking is performed manually.

Individual selection of controls

3-button, 1-button or keypad: You can choose from these three control elements to operate and activate the **MACO Comfort Drive drive units** directly on the casement door. As part of a smart home system, the drive units can also be conveniently and securely controlled via an app.

Built-in security

Good feeling: The integrated crush guard protection for sash weights of up to 330 kg means safety for children and pets. Equally reassuring is the ability to unlock and open the casement doors manually in the event of a power failure.
