Optimum weather seals for windows and doors

MACO Adapta weather seals are configured to coordinate perfectly with our hardware and to withstand everyday conditions. They offer the properties sliding doors need to keep rain, wind and cold out – and to keep the energy and warmth inside. As a hardware expert, we offer weather seals in a variety of materials for various areas of application, and with exceptional resilience. This refers to the elastic quality of the weather seal, which is compressed each time a window or door is closed and thus creates the seal.

Benefits for fabricators

01 Wide selection of materials

In a compact design: Weather seals in uPVC, TPE, EPDM and silicone. MACO is the only company to offer silicone L-shaped weather seals that run around corners and do not have to be cut to size.

02 Perfect customisation

For smooth and easy sliding: **MACO Adapta weather seals** offer the special geometry for this.

03 360° system components

Optimum interaction: MACO hardware, thresholds, seals and weather seals are perfectly matched to coordinate with each other and have been proven to hold absolutely air- and watertight.

Benefits for consumers

01 Excellent sealing performance

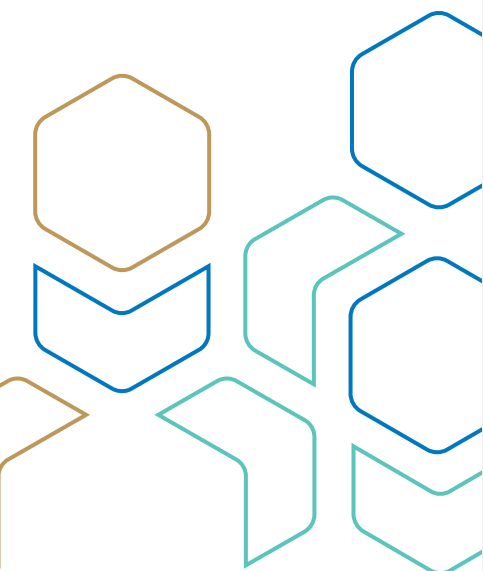

Maximum energy efficiency: For a better indoor climate and real savings.

02 Effective sound insulation

Certified and confirmed: **MACO Adapta weather seals** achieve the best ratings for the toughest requirements.

03 High durability

UV, weather and thermal resistance For excellent resilience over many years.

Special feature

Custom-tailored performance

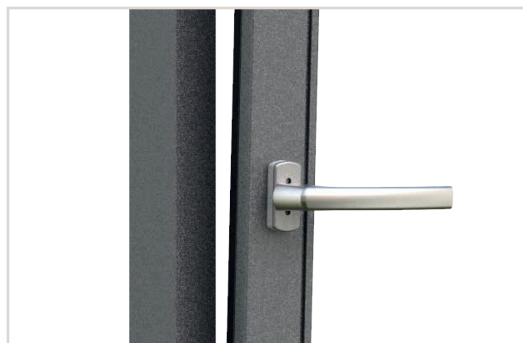

MACO Adapta weather seals are available with a wide range of performance features. That also makes sense: After all, the requirements for a sliding door seal are different to those for a window seal. What all our solutions have in common is their exceptionally long service life. So when choosing the coordinating weather seal, you can be sure that they have the required properties.
