Hardware for windows that open to the outside

With **MACO Espags MKV**, we offer a system of locking solutions for windows that open to the outside, also known as casement windows. Different requirements are placed on the locking mechanism for this type of window. Our easy-to-use system handles this superbly and provides a basis for various window solutions that combine quality, ease of use and security with fast installation. The MK refers to the German term “Multi Kantenverschlüsse” (multi-espagnolettes) and the V represents the 5th generation of Multi espagnolettes, with which we have been setting standards for decades.

Benefits for fabricators

01 Efficient installation

Simply better: Each espagnolette solution can be installed quickly and efficiently.

02 Technically advanced variety

Technically advanced: the coordinating espagnolette for every window design from a single source and tested to exceed PAS 24 requirements.

03 Compact system

One basis for all solutions: fewer individual elements for more space in the warehouse and faster production

Benefits for consumers

01 Sleeker design

Enhance your surroundings: slimmer window profiles enable more attractive window solutions.

02 Unbeatable security

Proven reliability: MKV exceeds all official requirements for burglary protection and tested to exceed PAS 24 requirements.

03 Secure upgrades

MKV is backward compatible – older MK espagnolettes can be replaced at any time

Special properties What you can expect from us

MACO Espags MKV telescopic

MKV telescopic is our espagnolette with telescoping hardware. This means it can be conveniently adjusted to the frame length without needing to cut any material. This results in faster installation and also allows for more slender window profiles. And these, in turn, are lighter in weight and in appearance – making for greater ease of use and a more elegant design.

Special properties What you can expect from us

MACO Espags MKV croppable

MKV croppable is our simple espagnolette specially designed for cutting to length. Removal of material to adapt it to the frame length is therefore intended and possible at any time. This also leads to faster installation as there is no need to drill around corners (any more). Like all of our espagnolettes, it allows for narrower window profiles and therefore greater ease of use and a more elegant design.

MACO Espags MKV Rail

MKV Rail is our espagnolette in a variety of versions. Thanks to this construction and functional design, it offers an especially high level of burglary protection with the same ease of use: simply turn the window handle 90° and the window is secured in several places at once. **MKV Rail** is available in various fixed lengths.

Information, solutions, advice MACO is here for you
