

MACO Homee LED Meanings

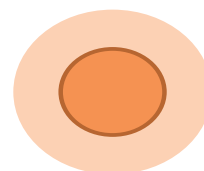

LED lights up green

Your homee is fine, it is connected to a power supply and is connected to the network.

LED lights up orange

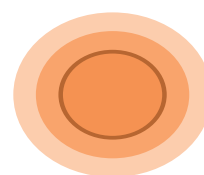

Your homee still needs your attention. Either a user has not yet been created, or your homee has not yet been connected to a network.

LED flashes orange

Slow: Your homee is working.

Fast: A cube has just been removed and the connection with it has been disconnected.

LED flashes green

Slow: Your homee is just powering up.

Fast: You have just installed a new cube and the connection to it is being established.
